

Natural-WSP®

100 % SOLUBLE SEAWEED EXTRACT

GUARANTEED CONTENT

100% Ascophyllum nodosum seaweed extract
Total Organic Matter..... 50% w/w

100% soluble extract of Ascophyllum nodosum which improves basic physiological processes in crops, such as photosynthetic activity, the setting of fruit or root development. The processes employed in its production maintain all of the components of the algae active and soluble so that they are immediately available to crops.

It contains a wide range of naturally occurring plant nutrients, a range of specialized amino acids (betaines), plus regular amino acids, polysaccharides, Short-chain carbohydrates, alginic acid, mannitol, natural cytokines, small amounts of micronutrients such as boron, manganese, copper, zinc, molybdenum and iron, calcium, magnesium, sulphur and vitamins, all of which are obtained from the Ascophyllum nodosum seaweed extract.

USES FOR WHICH IT IS RECOMMENDED

- To get better crop development
- To improve the roots development
- To get better flowering and fruit set
- To increase the photosynthetic activity
- To increase the accumulation of sugars in the fruits
- To help the plant to get over stress situations
- To contribute to the soil microbial activity

INSTRUCTIONS FOR USE

The application of Natural-WSP is recommended both in field crops and in intensive crops such as citrus, vegetables, strawberry, fruit culture, table grape, vine, olive trees, banana, turf, cut flowers and.

- Application to the soil: Applications since the first irrigations, for developing the roots and strength the vegetation.
- Foliar spray: Before and after flowering, and along the fruits growth, in order to get better fruit set and harvest.
- Dosage: 60-75 g/ha in foliar spray or 500-750 g/ha in a soil application.

Special Products

To plant in soils where it was not possible, to irrigate with high quality water, To improve the efficacy of pesticide treatments, and increase the easiness of applications. These products and others are needed to be introduced in the modern agriculture in order to develop profitable offer to the consumer for high quality goods.

The Special Products Range developed by Daymsa have as target to supply to the farmer modern tools that improve the profitability of his crops.
